

Informatrics and Libraries: Points of Intersection

M.S. Galyavieva

Abstract

In article attempt of the analysis of interrelation of subject domains «informatrics» and «information-library sphere» is undertaken. Existence, so-called, «points of intersection» at conceptually-terminological, theoretical-methodological, practical and pedagogical levels is revealed.

Key words: informatrics, bibliometrics, scientometrics, information-library experts, research libraries, information-library sphere.
